...Chapter 6 Part 3 ...

THE HAIR, both mohair and yarn.

We will also be doing the eyelashes and the clear coatings in this chapter.

~ [Part 1](#) ~ [Part 2](#) ~ Part 3 ~ [Part 4](#) ~

Now let's do the 2 pony tail hairdo.

1. First, glue or sew the hair all around the **FIRST** time exactly like for the 1 pony tail hairdo. Just the first time around though.

2. Now you have to do the center part. This takes a change in thinking. Everything will be done in reverse, just like for the first time around, but it will also be on the opposite side of the center of the head from what your brain will try to tell you.

Again, I am going to mark it, so you can see it. This isn't at all hard, just confusing for a minute. You don't have to mark it, but it helps for this center area.

The brown band starts at the center seam. (part) The black is where the wefting goes.

You can see the center seam (part) in the photo.

The hair will hang over the **LEFT** side of the head, while you are gluing the **RIGHT** side hair. After it is glued, you will flip it over the right side.

4. When the strip reaches just past the wefting of the strip that goes around the head, cut it off.

[Image 6-19.1](#)

The brown band and black line for glue location.

[Image 6-19.2](#)

How to press the entire section down. Spread the glue and press the hair into it. NOTE the location of the hair and the seam. Glue the hair down all the way from the front to the back.

5. The hair is glued from the front to the back, leaving a bald spot on the right side of the head.

[Image 6-20.1](#)

The hair is glued to the RIGHT side, and still hanging over the left side. It leaves a bald spot on the right side.

[Image 6-20.2](#)

Lift the hair to be sure you have covered all the marks and the hair is tight against the seam. When you pull the hair down over the right side the bald spot is on the left.

4. Now, mark the other side if you feel the marking keeps you on track. Pull the hair that is already glued in place down hard and pin it down on the right side so it doesn't get up in the glue for the left side.

5. Apply the glue as you have been doing all along, In the picture I started at the back.

Be careful not to get glue all over the hair that is already glued down. That hair is 1/2 of the center part hair, and will be showing on the finished hairdo.

[Image 6-21.1](#)

Pull the right side hair down and mark the glue location on the left side.

[Image 6-21.2](#)

Apply the glue carefully.
Note the already glued hair folded back from the part.

5. Press the next strip of hair into the glue from back to front as in the picture (or Vice versa) When you reach just past the wefting, cut the strip off.

[Image 6-22.1](#)

Glue this side down all the way from the wefting at the front to the wefting at the back.

[Image 6-22.2](#)

Now, both sides are glued and pulled down to their correct position, forming the part for the picture I have lifted them up a little so you can see the hair on each side, and the wefting all around. All that hair in front is hanging over the face.

6. Right in the front, for about $\frac{3}{4}$ " on each side of the part, the hair is almost always a little thin. I add an extra strip right over the wefting, with the hair hanging over the face.

This way, when you pull the hair back and divide it in the very front for the center part there is plenty of hair to cover all of the wefting. With dark hair, that has been wefted with light thread, I will use a permanent marker and color the wefting there too.

[Image 6-23.1](#)

The hair is a little thin here in front.

[Image 6-23.2](#)

Glue a strip right over the previous wefting.

7. Now you need to fill in the bald areas on the right and the left sides, under the hair that goes down the center.

8. You simply glue hair all around in those areas again, just like you did for the 1 pony tail hairdo. One more time around is usually enough, but if you desire, you can fill in the little spot left too. Of course, do both the right and the left sides.

[Image 6-24.1](#)

The bald area on the left side.

[Image 6-24.2](#)

The bald area filled with one more "glue around".

9. Now "finger comb" and "needle comb" the hair up and to each side, to make a pony tail on each side. You will lose some hair while doing this and you will feel like this mess of hair will never be arranged...but...keep at it and you will soon have it under control. I promise!

[Image 6-25.1](#)

Starting to arrange the hair.

[Image 6-25.2](#)

One side pulled up, combed and ready to tie.

10. You may need some help to tie the ponytails in place. One person to hold them and one to tie. Don't tie them real tight to the head. Leave the hair all around kind of "poufy". It makes a much nicer "look".

[Image 6-26.1](#)

The ponytails tied in. Front view.

[Image 6-26.2](#)

The ponytails tied in. Back view.

Sometimes your doll won't want ponytails at all! Not one and not 2. In that case, you can arrange either the 1 ponytail or the 2 ponytail hairdos into a long loose down style. The front has to be pulled back though.

10. Simply needle comb some more and re-arrange the hair. Pull the front hair towards the crown and tie it there. At first, due to all the fussing and combing the hair will be fluffy and bushy.

11. Carefully wet your hands with warm water and keep scrunching it with your fingers to put some of the curl back.

[Image 6-27.1](#)

The hair down with just the very front tied back. The hair is quite bushy.

[Image 6-27.2](#)

The hair has been wet and crimped.

I haven't decided yet if the hair will be left down, or be put up after dressing. It will be a surprise!

Remember Me? I wanted my hair down too.

[Image 6-28.1](#)

The Giants Fairy close up.

Image
6-28.2

[Image 6-28.2](#)

The giants Fairy full view.

Mine is pulled up from just in front of the ears, with little strands left down.

Judi made me into a "Giant's Fairy", since I am 24" tall. Giants need to have a fairy's too!

My wings are real dried leaves. They are sprayed with several coats of clear acrylic spray and sprinkled with glitter. They are very fragile.

I have a ribbon tied around my bust, (the nipples are drawn with colored pencil) and silk flowers glued up my tummy from my silk "handkerchief" skirt to the center of my bust.

The handkerchief skirt is made by cutting 6 to 8, ten inch squares of soft washed fabric like sheer silk. Pick each piece up by the center and then pin it to the doll's body. Now take a piece of lace and wrap it around the body over the pins. Pin each piece of silk to the lace band. Take it all off and sew the tips of the silk to the band. Put the "skirt" on and sew it together in the back. Sew or glue some silk flowers here and there around the skirt too.

Fairy's don't wear panties, so you get off easy here!
